Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/518,322	Applicant(s) SHALEV, ALON	
	Examiner DEBORAH MALAMUD	Art Unit 3766	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 July 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
3. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 5-6 and 10-14, drawn to a method.

Group II, claim(s) 19-20, 23-24, 27, 30-31, 34 and 40, drawn to a method.

Group III, claim(s) 47-48, drawn to a method.

Group IV, claim(s) 51-52 and 54-55, drawn to a method.

Group V, claim(s) 53, 84 and 89-94, drawn to a method.

4. The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I has the special technical feature of a stimulation signal configured to increase a clearance of an Alzheimer's disease (AD) related constituent of a central nervous system (CNS) of a patient. This feature is not required by any of the other groups, and results in the utility of ridding a patient's system of a constituent or precursor of AD.

Group II has the special technical feature of supplying a pharmaceutical agent to the systemic blood circulation of a patient, and of a stimulation signal configured to cause an increase the passage of the agent from the systemic blood circulation into a CNS of a subject. Neither of these features is required by any of the other groups, and they result in the utility of dispensing a drug to a patient in combination with a stimulation therapy in order to increase the efficacy of both the drug and the stimulation therapy.

Group III has the special technical feature of a stimulation signal configured so as to cause an increase in cerebral blood flow of the subject. This feature is not required by any of the other groups, and has the utility of providing greater oxygen to the brain, thereby better nourishing the neurons in the brain.

Group IV has the special technical feature of a stimulation signal configured to cause an increase in molecular passage between a CNS of the subject and another body compartment of the subject. This feature is not required by any of the other groups, and has the utility of ensuring that molecules, including nutrients and chemical signals, pass easily within the body of the patient, thereby facilitating movement and nerve conduction.

Group V has the special technical feature of an odorant that is presented to an air passage of a patient. This feature is not required by any of the other groups, and has the utility of aiding in the diagnosis of AD.

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to DEBORAH MALAMUD whose telephone number is (571)272-2106. The examiner can normally be reached on Monday-Friday, 9.00am-5.30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl Layno can be reached on (571) 272-4949. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
